(54) Abstract Title

Electronics cabinet cooling sytem

(57) A cabinet for housing telecommunications equipment in outdoor locations includes an enclosure (20) for containing the telecommunications equipment. A subrack (40) is mounted within the enclosure. A duct (56) directs ambient air from outside the cabinet to the subrack. A fan (80) draws ambient air into an inlet (52) through the duct through the subrack and out of the enclosure. A heater (62) is provided for heating inlet air when ambient temperatures are low.
